Note: If you have a Referral Link from someone, you can copy paste the referral link in the search bar. This will take you directly to the Register Page.

You will be directed to the Mr Mint web page and you have to click on Get MNT.
Since you are a new user, you should click 'Sign Up' by scrolling down on the same page.

Note: If you used a referral link in the previous step, you will not get these 2 pages, and will go directly to the Sign Up page.

After clicking Sign Up, a page opens where you click 'Connect' to connect your wallet.

As your wallet is connected, you will be back on the Mr Mint web page where you can put your email ID and password to Register. Click Register Now.

Congratulations, you are now registered and eligible to buy Mr Mint's MNT Tokens!
